REFER TO THE FIGMA FILE:

Index page (Iteration 2 in the figma file)
It contains About us, How it works, find mentors and join as a mentor buttons that will navigate in the same page.

It will take the user to the relevant content present on the same page.

Find my mentor button - It opens the sign up page for the mentee. If the user has not registered they can navigate to the registration page to first register and then signup. All these require database storage.

After login the Iteration 1 page will open for the mentee and the mentee can search for their mentors.

Become a mentor button - The signup page opens for the mentor and if the user has not registered they can navigate to the registration page to first register and then signup. These require database storage as well.

Mentor Registration - The step 1 asks for creating a calendly account and submitting the link in the space provided. This page opens when the mentee clicks on the schedule button and the mentee can book a meeting with the mentor by looking at the available time slots for the meet. The mentor should be notified about the same.

Step 2 asks for a feedback link which can be kept optional.

Mentor dashboard:

1. View profile - general information that the mentor can update in case of any changes and a profile photo updating option.
2. View progress - Once a meeting is scheduled with a mentee, the mentor can maintain a personal record of the upcoming meetings and completed meetings.

Mentee dashboard: (Iteration 1 in the figma file)

1. Mentor's details with profile photo, college name, etc with schedule and mail options are displayed.
2. Mentee can search for a particular college using the search bar and the website shows the mentors studying in that particular college alone.
3. The schedule button will take the mentee to the mentors calendly page.
4. The mail a request button will take the mentee to the gmail/email account and TO: part should be automatically filled with that particular mentor's Email ID.
5. Confirmation of the meeting should be automatically displayed to the mentee and notified to the mentor in some way.
